ABOUT ME

AI-focused Computer Science graduate with practical experience in machine learning, LLM deployment, data annotation, and automation workflow development. Skilled in Python, model building, model evaluation, and deployment, with hands-on exposure to modern AI development tools such as Codex, Claude Code, and OpenClaw. Interested in building practical AI solutions, improving development workflows, and applying machine learning and automation to real-world business and technical problems.

EDUCATION

2021 - 2025	**Ton Duc Thang University**	**Bachelor of Computer Science**
2023 - 2024	**University of Science - VNUHCM**	**Data Science and Machine Learning Certificate**
2017 - 2020	**Hai Ba Trung High school**	

EXPERIENCE

1/2025 - 3/2026

Seal Labs

R&D Assistant

- Analyzed BTC/ETH trends, stablecoin flows, ETF/regulatory updates, and on-chain activity.
- Built automated workflows using Dune, RPC data, spreadsheets, and dashboards to track liquidity, CEX flows, whale wallets, liquidation risks, AMM performance, and yield strategies.
- Created simple backtests for mean-reversion strategies and turned crypto data into clear market insights.

6/2024 - 12/2024

Keppel Land Viet Nam

Data Analyst Intern

- Supports the collection, analysis, and interpretation of customer feedback to identify trends, pain points, and opportunities for service enhancement.
- Collaborates with cross-functional teams to implement service improvements that drive customer satisfaction and operational efficiency.
- Conducts research and development on Large Language Models (LLMs) and chatbots to enhance the capabilities of conversational AI systems.

SKILLS

- Python (Good)
- Build / deploy LLM
- Codex / Claude Code (Create skill, build work flows)
- AI automation (n8n, OpenClaw)
- Machine Learning (Pytorch, Keras, focus on Computer Vision)
- Java (Medium)

ACHIEVEMENTS

- Project consultant won the award in the programming contest K&H HACK3 | Hybrid hackathon in Budapest, Hungary
- Co-authors of two research papers about Deep Learning (one has been publised on Tiny Papers @ ICLR 2024 Present)
- 4th prize in Cross Value Chain Global Hackathon in Vietnam
